Socialism is a science

By Hwang Jong Ryol PT

The socialist cause of the DPRK could win victory after victory for decades, which is unthinkable apart from the immortal contribution of Chairman Kim Jong II who clarified the scientific accuracy and truthfulness of socialism.

From the late 1980s to the early 1990s socialism suffered a setback in several countries. When the tragic situation occurred, the imperialists and reactionaries of history clamoured for the "eternity" of capitalism, even trumpeting about the "end of socialism".

At this juncture, Chairman Kim Jong II made public the immortal classic work Socialism Is a Science on November 1 1994 to deal a crushing blow to the of historical development a social being, is the only

imperialists and renegades of that a society based on socialism.

the work, he In comprehensively analyzed and reviewed the course of historical development of the socialist ideal and socialist movement and clearly defined that genuine socialism and the most advantageous and vital socialism is man-centred, people-centred socialism.

particular, proved that in a society based on individualism class antagonism and inequality are unavoidably generated, accompanied by exploitation and oppression, independence of the masses of the people cannot be achieved and it can only be attained in socialist society based on collectivism, and that it is an inevitable course

individualism is transformed into the one based on collectivism.

It constitutes a new formulation of the socialist theory on the basis of the Juche idea, the mancentred revolutionary idea, by completely overcoming the limitations of the socialist theory based on the materialistic conception of history.

Kim Jong II also expounded on the intrinsic advantages of socialism in his work. According to it, the intrinsic advantage of Korean-style socialism is that it is based on the Juche idea.

The Juche idea clarified that independence, creativity and consciousness are man's intrinsic attributes and man,

master of the world and the most precious and powerful being.

Starting from such Juchebased view of and attitude to man, socialism of the DPRK makes everything serve the people and solves all problems by enhancing their creative role.

Therefore, the masses of the people take the position as masters of everything, fulfil their due responsibilities and role and lead the most worthwhile and happy life.

After that, the Chairman published many classic works to explain the validity, originality, great vitality and significance of the socialist idea and gave correct answers to the theoretical and practical problems arising in advancing the Korean revolution and the the Central Committee of the

world socialist cause.

The looks of the DPRK, which wins victory after victory and makes a leap forward, overcoming severe trials in the 1990s when sophism about the "end of socialism" spread, proves the inevitability of the victory of socialism as a science.

Today, socialism has become the life of the Korean people and the mainstay of their faith.

In the DPRK the afflicted areas where everything had been swept by flood and heavy rain were turned into ideal socialist villages and powerful measures taken to block the whole country for the safety of the people's lives, ready to suffer huge economic losses. When COVID-19 made inroads into the country, officials from

Workers' Party of Korea to Party and government organs at all levels made their way and supplied medicines to the last family in the remote mountain village. And the production of school uniforms and supply of nutritious foodstuffs to children were high on the agenda of the Party Central Committee and luxurious dwelling houses and new streets were built wonderfully in succession and provided to the people for free. That's why the Korean people call their socialist country "our home".

Now Korean socialism vigorously advances towards a brighter future, forming a single-minded unity of the leader, Party and people and enjoying absolute trust and support of the masses of the people.

Sea of greenhouses unfolds in Ryonpho area

By Kwon Hyo Song PT

A large-scale greenhouse farm was built in the Ryonpho area on the east coast of Korea.

"A new look of socialist farm village was unfolded as a greenhouse farm that nothing else can match in terms of size, style and modernization was built there in a matter of a few months," said Jo Song Dae, manager of the Ryonpho Greenhouse Farm.

And he said with excitement that the Ryonpho Greenhouse Farm, which was built splendidly as the base for creating rural civilization in such a difficult period as now, is another present that the Workers' Party of Korea provides for the people.

Covering a production area of

one with production capacity of over tens of thousands of tons and with the production of vegetables put on a modern, intensive and industrial basis at a high level, that for practical education advanced disseminate agricultural technology and a new base for rural civilization.

Over 850 hydroponic and soil greenhouses covering an area of 280 hectares and over a thousand dwellings, schools, a hall of culture and comprehensive service facilities designed to suit the specific feature of the local area are in harmony by divisions. The large farm area demonstrating the civilization of a new era makes people bubble with great admiration and passion.

The farm, once the ideal of and as a new base for creating

over 100 hectares, the farm is the people, was built in a little over 230 days since groundbreaking under the leadership of the WPK.

> General Secretary Kim Jong Un, who was determined to build a largescale greenhouse farm in South Hamgyong Province, a largescale industrial province with a greater number of population than other provinces, chose an important military base on the eastern front as the lot for the

And he saw to it that the greenhouse farm was built as a new standard of greenhouse farm, the largest in production area and capacity, with the production of vegetables put on a modern, intensive and industrial basis at a high level

rural civilization.

Three years ago he personally confirmed the site for the Ryonpho Greenhouse Farm in the face of sand storm which raged so strongly as to make it difficult to take steps, put forward the construction of the farm as the most important task of the construction policy for this year and solved all problems arising in the project.

The Ryonpho Greenhouse Farm was inaugurated on October 10 to mark the founding anniversary of the WPK, thanks to the care of the Party which regards it as the goal of the revolution and the state's mode of development to completely realize the people's dream and ideal.

Camping at its height at Mangyongdae Children's Camp

By Pang Un Ju PT

Children's camps are situated in scenic spots of the DPRK.

Among them is the Mangyongdae Children's Camp located at the foot of beautiful Mt Ryongak, which has long been called thus as its peak looks like a dragon about to fly up to the sky, or called Mt Kumgang in Pyongyang for its scenic beauty.

Thanks to the policy of the Workers' Party of Korea which spares nothing for the rising generations, the camp was renovated to suit the modern aesthetic taste in 2016.

What first catches your eye on the road to the camp is the sight of three six-storey camp buildings standing in a line, decorated with bright-coloured tiles to contrast with thick forest of the mountain.

In the cozy buildings, there are bedrooms and folk game rooms, video game rooms, karaoke of schoolchildren.

The camp also has a two-storey hall where campers can do colourful cultural artistic activities. The hall has rooms for the diffusion of knowledge on the sea and mountain-climbing, which are designed to produce cubic effect.

The dining hall of the camp can serve meals for many campers at a time. The hall also has a dining room to congratulate campers who greet their birthdays during camping and a cooking practice room where campers can cook by themselves.

In addition, the camp has an outdoor swimming pool, boating-ground, animal shed, folk game ground, basketball court and wide playground where campers can dance and play sports games.

According to Pae Kwang Su, section chief of the camp, over 1 170 terms of camping have so far taken place at the camp, involving more than 1 008 000 schoolchildren since its founding.

The Ryonpho Greenhouse Farm sprawls over 100 hectares of production area.

See Mangyongdae Children's Camp on p9

Choe Ryong Hae inspects various units in Nampho

Choe Ryong Hae, member Political Bureau of the Central Committee of the Workers' Party of Korea, first vice-president of the State Affairs Commission of the DPRK and chairman of the Standing Committee of the Supreme People's Assembly, visited several units in Nampho City.

At the kindergarten of the Taean Heavy Machine Complex he asked the officials and kindergarten teachers to bring up the children healthily and improve the educational conditions and environment effectively, bearing in mind the noble intention of the Party Central Committee that puts first the work for the rising generations as the top priority affair.

Quality dental hygiene supplies developed

By Han Jong Ho PT

Pyongyang Dental Hygiene developed different kinds of quality dental hygiene is effective in removing so they need different of the institute.

Among them there are functional and medical toothpastes and gargles.

One of the toothpastes is potassium nitrate antihypersensitivity toothpaste which, as a functional one, makes up for the lost enamel of teeth.

The toothpaste is said to be good even for toothache. There are also poplar antibacterial and aloe antiinflammatory toothpastes capable of preventing and treating pyorrhoea alveolaris and periodontal disease.

Nicotine-removing toothpaste in particular is in great demand as it removes not only the nicotine marks caused by smoking on teeth and the relevant smell but also the spots caused by tea or coffee on teeth.

OPINION

Foolish act of 'human trafficking superpower'

THE PYONGYANG TIMES

Recently, the US staged a farce of publishing a "memorandum" on cutting off the government funding in the fiscal year 2023 to the anti-US independent countries including Russia, China, Cuba, Iran, Syria, Nicaragua and our country over what it called "human trafficking situation" in these countries.

It is ridiculous enough for the US to mouth off about the human rights of other countries at will, posing itself as a "human rights judge". But what is really a sight to see is that the US is clamouring for "elimination of human trafficking", being ignorant of its own pitiful state.

When it comes to human trafficking, the US is a country unfit to say anything

That is because the US is the one and only country in the world that was born as a result of human trafficking.

The US prides itself on having the "history of founding" and "history of prosperity". But it is the history of human trafficking written by the blood, sweat and lives of tens of millions of black slaves who were sold to the American continent. The US is also the country where forced labour and human trafficking are most

According to data released by Denver University in the US, 23 sectors of the country including agriculture, tourism, restaurants and medical institutions are seeing an increase in the human trafficking cases, and a minimum of 500 000 people are being subjected to forced labour, living in conditions similar to the modern slavery system.

Data from the US State Department alone shows that the number of people sold from foreign countries and subjected to forced labour amounts to over 100 000, more than half of which are underage

It is already well known to the world that in the US numerous child workers are engaged in farming, more than 240 000-350 000 women and children have been degraded to sex slaves, and tens of thousands of people have long been subjected to forced labour being confined

In the past five years, 11 500 human trafficking cases were reported from 50 states, which is an increase by several times compared to 3 200-odd cases in the past period.

Such a country with a shameful past and present is now trying to pass itself off as a "human rights judge". This is enough to make a cat laugh.

The US should first keep its nose clean before worrying about others.

Efforts go into training talented scientists, technicians

Briefly

President calls for enhancing role of youth

Cuban President Miguel Mario Diaz-Canel Bermudez called for enhancing the role of young people at the special plenary meeting of the national committee of the Young Communist League of Cuba on October 22.

He emphasized that the Young Communist League should always understand well what young people like or dislike and take immediate measures for correcting all negative things.

FM opposes military ties between Japan and Australia

A spokesman for the Chinese Foreign Ministry on October 24 said that China resolutely opposed the military tie-up between Japan and Australia as he answered the question raised by a journalist on the fact that the two countries recently concluded an agreement of

He stated that the exchange and cooperation between countries should not be aimed at the third party or infringe on the interests of the third party, but be helpful to deepening the mutual understanding and trust between regional

A military bloc is unnecessary in the Asiaregion furthermore, there is no need to incite confrontation and a new cold war between camps. he asserted.

Carrier rocket launched

The Russian Aerospace Force launched a Soyuz-2.1B carrier rocket at a cosmodrome on October 21.

Reportedly, it was loaded with space instruments.

Hostile acts of UK countered

The Iranian Foreign Ministry, in a statement on October 19, said that it would apply sanctions to British entities and individual figures that are hostile to the

Saying that the sanctions serve as a countermeasure against their support to terrorist groups and inciting and agitation of violence, misanthropy and infringement on human rights, the statement stressed that the British government should bear responsibility for such misbehaviour.

COVID-19 **Global casualties**

According to a foreign media report, 634 104 675 persons contracted the novel coronavirus worldwide, 6 587 449 died of it and 14 390 401 were undergoing treatment as of 24:00 on October 26.

SPORTS

By Ri Sung Ik PT

The final matches of the autumn amateur golf tournament took place at the Pyongyang Golf Course on October 19-20.

O Kwang Hyok, viceof Physical Culture and Sports who is concurrently chief of the Golf Association of the DPRK, said in the opening ceremony which was held on October 19, that he hoped that all the participants would achieve good results while displaying noble sportsmanship and fair

play with the pride in leading the spread and development of golf culture in the country.

There were stroke play, doubles, skill competition and water golf amusement games in the amateur golf tournament, drawing over 40 amateurs.

In order to ensure fair play, the organizing committee of the contest divided participants into four divisions according to their level, age and sex. The first division involved amateurs whose handicap is less than 97, the second division more

than 98, the third division for women fans and the fourth division included the aged amateurs above 60 who could not do the whole match play for their health reasons.

In the stroke play, the players of the first division played four rounds with 18 holes, the second- and thirddivision players three rounds and the fourth-division players two rounds with 9 holes. The rankings were decided by bringing the results together.

Paek Sun Hak won the first place in the first division, Kim Myong Nam in the second division, Jon Kyong Hui in the third division and Ryu Song Thack in the fourth division.

In the doubles, women amateurs of the third division teamed up with men amateurs whose average handicap is less than 110 and played two rounds with 18 holes. The rankings were decided by putting together the results of the two rounds.

Kim Su Ryon and Kim Jong Chol won the doubles event.

Kim Su Ryon, who competed in the thirddivision, demonstrated her excellent skills with the handicap of around 70 in the preliminaries.

In the skill competition, which was held through driving contest, near pin and hole-in-one, Ho In Chol won prizes in the driving contest and near pin by displaying high skills.

In the closing ceremony on October 20, diplomas, cups and relevant prizes were awarded to excellent players.

During the event in which

80-odd-year-old competed in harmony with those in their twenties, the doubles and water golf amusement games were held in a spectacular way.

Ri Yong Ju, a senior staffer of the Ministry of Physical Culture and Sports and one of the organizers of the contest, said that the last two events which were held very distinctively unlike those of last year encouraged the zeal for the contest among beginners and injected youthful vigour into the aged golf fans.

AN YONG CHOL / THE PYONGYANG TIMES

The final matches of the autumn amateur golf tournament are held at the Pyongyang Golf Course.

'It was a game of pleasure, joy'

often play golf, but this is the first time for me Lto compete with many people.

I have never thought that such young amateurs and women would play very well, though I have played golf for over ten years.

I hope that I will meet them more frequently in the future.

I feel ten years younger while playing golf together with young people at the Pyongyang Golf Course which boasts a beautiful landscape as Lake Thaesong and Mt Sokchon go well with each other.

Choe Kyu (aged 76)

I have taken part in a amateur golf tournament for the first time.

As many amateur golfers gathered, I felt more competitive and had to strike

each ball so carefully.

I only decided to have a try, and I have taken the first place.

I offer my gratitude for providing this excellent contest in which any amateur can take part.

Paek Sun Hak

This is the first time I played the doubles.

As everyone else would do, I thought much how my partner and I could play the game well with one accord.

It was a difficult game, but I took the first place.

What is most delightful

is that I have reached a handicap of 70 for the first time during this contest.

I want to play better in the

I hope that more people would participate in this

Kim Su Ryon
